## Experience

### 2018 - At the moment

La Inmaculada Pedagogical Center (Colombia)

#### Fullstack Web Developer

I developed from scratch a school system for recording grades, recoveries, attendance, different types of reports, grade reports, certificates, virtual classroom, management of different access levels, among other functions. Using technologies such as HTML5, CSS, JS, PHP, MySQL. Currently, I'm migrating it to Next.js.

### 2024

ACADEMLO

#### Fullstack Web Developer

Developed a fullstack project with a functional interface that offers login, user registration, hotel reviews, and an integration with my own API. It uses technologies like Node.js, Sequelize and Express for a secure and dynamic experience.

### 2008 - 2018

Miranda State Government - INFRAMIR (Venezuela)

#### Comprehensive Computer Systems Analyst

Provided technical support and maintenance to a network of over 100 computers. I also installed and configured extensions for the existing network. I collaborated in the updating, administration and maintenance of the internal system, using technologies such as PHP, MySQL, HTML, JS and CSS.

## Education
